

**Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60**

1. Project Contact and Coordination Information

a. Identify the project leader(s) and respective business affiliations.

Rocky Mountain HealthNet (RMHN) represents mental healthcare providers in Colorado who are members of the Colorado Behavioral Healthcare Council. (CBHC). This extensive alliance was formed for the purpose of responding to the FCC Pilot Program in an effort to gain access to telemedicine services through a new broadband regional network.

CBHC is a non-profit 501 (c) 3 membership organization that represents Colorado's statewide network of community mental health centers. CHBC member organizations contract with the State of Colorado and work together to provide comprehensive behavioral and psychiatric services to defined geographic areas of the state.

The Project Coordinator is George DelGrosso.

b. Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official

George DelGrosso
Colorado Behavioral Healthcare Council
1410 Grant St. Ste. A-301
Denver, CO 80203
Telephone 303-832-7594
FAX 303-832-7132
gdelgrosso@cbhc.org

c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

The Colorado Behavioral Healthcare Council (CHBC) is the applicant organization and will bear full legal and financial responsibility for the proposed project.

d. Explain how project is being coordinated throughout the state or region.

CBHC is sharing with a sister Pilot Program participant, the Colorado Health Care Connections (CHCC), the services of a FCC Pilot Program Associate Project Coordinator. No federal USAC funds will be used for this purpose. Program coordination staffing and activities will be carried out using internal resources.

Program coordination will include the leadership, fund-raising, and implementation needed to develop healthcare applications enabled by the proposed network.

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

2. Identify all health care facilities included in the network.

See attached Addendum A (spreadsheet which addresses items a. and b. below) with information on all health care facilities that are included on the network.

- a. Provide address (including county), zip code, Rural Urban Commuting Area (RUCA) code (including primary and secondary), six-digit census tract, and phone number for each health care facility participating in the network.**
- b. For each participating institution, indicate whether it is:**
- i. Public or non-public;**
 - ii. Not-for-profit or for-profit;**
 - iii. An eligible health care provider or ineligible health-care provider with an explanation of why the health care facility is eligible under section 254 of the 1996 Act and the Commission's rules or a description of the type of ineligible health care provider entity.**

3. Network Narrative: In the first quarterly report following the completion of the competitive bidding process and the selection of vendors, the selected participant must submit an updated technical description of the communications network that it intends to implement, which takes into account the results its network design studies and negotiations with its vendors. This technical description should provide, where applicable:

The competitive bidding process was initiated on December 18, 2008 with the posting of Form 465, 465 Attachment and RFP. Bid proposals were officially opened on January 19, 2009. A proposal evaluation meeting was held on February 2, 2009. RMHN followed documented Competitive procurement Policies and Procedures. Committee members completed detailed, quantitative proposal evaluations keyed to the RFP evaluation criteria. RMHN selected the bid proposal submitted by Qwest Communications as it most nearly conformed to the specifications set forth in the RFP, will best serve the needs of RMHN and its members, and will provide the most cost effective means for producing results defined in the RFP. RMHN and Qwest Communications completed negotiations and signed a contract on June 29, 2009.

a. Brief description of the backbone network of the dedicated health care network, e.g., MPLS network, carrier-provided VPN, a SONET ring;

The Rocky Mountain Health Net (RMHN) is a carrier-provided VPN. RMHN has contracted with CenturyLink to provide a reliable, secure, managed broadband network (the Network) that links participating health care providers (HCPs) to one another with both Layer 2 and 3 transport including Asynchronous Transfer Mode (ATM) and Metropolitan Optical Ethernet (MOE). CenturyLink has subcontracted with major ILECs and CLECs in Colorado to provide ubiquitous transport statewide.

b. Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds;

The Network provides Ethernet handoff to each participating HCP terminated on a CenturyLink-managed router (CPE) placed on the HCP customer premises. Transmission speed categories and transport (in parentheses) are 4.5/5.0 Mbps, 7.5 Mbps, 40 Mbps and 100 Mbps. CenturyLink and RMHN will jointly determine the IP addresses needed to meet RMHN's business requirements and CenturyLink will provide the public IP addresses to be used by

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

the HCPs for network address translation (NAT) and port address translation (PAT) services on individual HCP CPEs. If required by an HCP, CenturyLink will provide NAT and PAT services on that HCP's CPE device to translate LAN RFC1918 IP addressing into pre-determined unique, publicly routable IP addresses. CenturyLink will address the Ethernet handoff with IP addresses determined by the HCP. CenturyLink will provide Dynamic Host Configuration Protocol (DHCP) services on the CPE if required by the HCP.

c. Explanation of how and where the network will connect to a national backbone such as NLR or Internet2;

The Network will obtain access to Internet2 at the Front Range GigaPoP (FRGP), a national research network node operated by the University Center for Atmospheric Research. RMHN will subscribe to Internet2 for this access.

d. Number of miles of fiber construction, and whether the fiber is buried or aerial;

CenturyLink will spend approximately \$17M to build out more than 25 miles of new fiber construction to support this project. These builds will be from central offices to specific HCP sites, in particular those subscribing to 40 and 100 Mbps service.

e. Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based.

RMHN has contracted with CenturyLink for a managed services solution. These services include: IP addressing and routing; 7 X 24 network monitoring; architectural support for private subnetworks emulating hub-and-spoke topologies; Quality of Service traffic management; a single gateway firewall between the Network and access to both the Internet and the FRGP; read-only SNMP and Sflow access to designated CPE routers; and, multicast capability. All systems reside or are based in CenturyLink facilities.

4. List of Connected Health Care Providers: Provide information below for all eligible and noneligible health care provider sites that, as of the close of the most recent reporting period, are connected to the network and operational.

105 RMHN members have been installed and tested by service provider, CenturyLink. 105 members have completed their testing, accepted service and are operational. There have been three site substitutions as of the close of the current reporting period. There are currently 105 operational members.

See attached Addendum B for operational HCPs (spreadsheet with items a. through g. below)

a. Health care provider site;

b. Eligible provider (Yes/No);

c. Type of network connection (e.g., fiber, copper, wireless);

d. How connection is provided (e.g., carrier-provided service; self-constructed; leased facility);

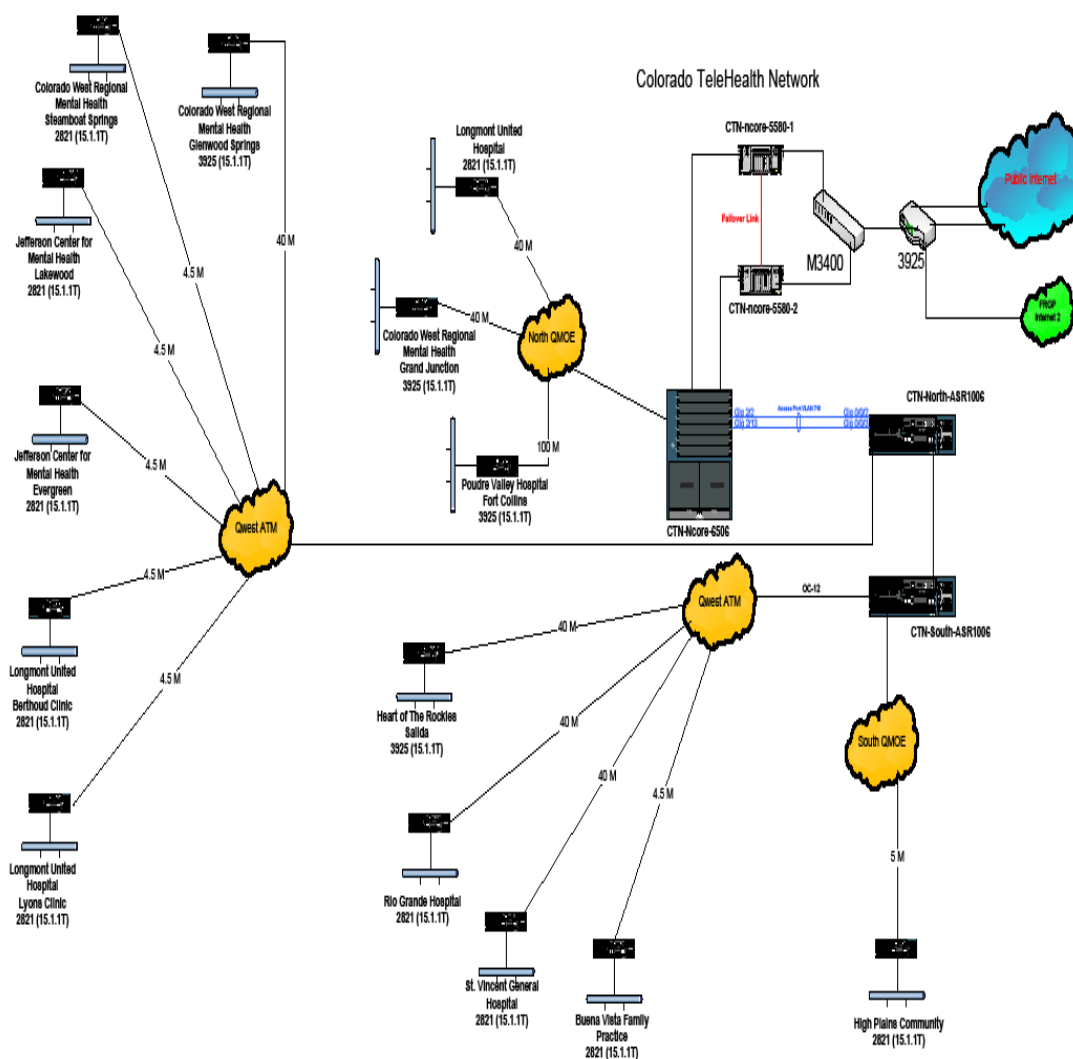

e. Service and/or speed of connection (e.g., DS1, DS3, DSL, OC3, Metro Ethernet (10 Mbps);

f. Gateway to NLR, Internet2, or the Public Internet (Yes/No);

g. Site Equipment (e.g., router, switch, SONET ADM, WDM), including manufacturer name and model number.

h. Provide a logical diagram or map of the network.

Note: Sample of members that will be connected to CTN

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

5. Identify the following non-recurring and recurring costs, where applicable shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.

- a. Network Design*
- b. Network Equipment, including engineering and installation*
- c. Infrastructure Deployment/Outside Plant*
- i. Engineering*
- ii. Construction*
- d. Internet2, NLR, or Public Internet Connection*
- e. Leased Facilities or Tariffed Services*
- f. Network Management, Maintenance, and Operation Costs (not captured elsewhere)*
- g. Other Non-Recurring and Recurring Costs*

ROCKY MOUNTAIN HEALTHNET (RMHN)					
RHCPP COSTS					
June 30, 2013					
Type HCP	Type Expense	Type Service	Calendar YTD Budget	Calendar YTD Actual	Project To Date Actual
Eligible	Non-recurring	Leased/Tariffed Facilities or Services	-	-	1,425,700
Eligible	Recurring	Leased/Tariffed Facilities or Services	1,012,976	1,012,976	4,218,723
Non-eligible	Non-recurring	Leased/Tariffed Facilities or Services	12,794	12,794	49,602
Non-eligible	Recurring	Leased/Tariffed Facilities or Services	19,399	19,399	75,695
TOTAL			1,045,169	1,045,169	5,769,720

NOTES:

1) Figures are exclusive of taxes, fees, and surcharges (e.g., state sales tax, county sales tax, Colorado Universal Service Fund)

6. Describe how costs have been apportioned and the sources of the funds to pay them:

RMHN received its Funding Commitment Letter on March 11, 2010.

a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.

A high-level summary is presented here. The detailed description of RMHN cost and pricing strategy cost data was provided with our Form 466-A Package. It includes a spreadsheet showing all cost and pricing data and a narrative explaining the process. USAC reviewed and accepted these documents as a part of the FCL approval process. During this process, RMHN made a number of changes to its cost/price documents and methods to comply with USAC guidance. The final posted documents incorporate these changes.

The high-level summary is: RMHN costs are established by CenturyLink under the terms of our service contract with them. Costs are presented in two categories: Access Costs (itemized by HCP) and Infrastructure Costs. Access Cost is the per-HCP costs of providing site specific network service (NRC and MRC) for eligible members. The 466 A Attachment HCPs comprise the Initial Access Cost set of HCPs.

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

Non-eligible, new and upgraded members have their unsubsidized per site costs shown in Figure 1 as Growth Access Costs. Infrastructure Costs are also divided into the Initial and Growth pools. Growth infrastructure costs are pooled to be used to implement the infrastructure necessary to serve the needs of this group. These costs and HCP payments are, not reflected in Form 466-A Attachment or the Network Cost Worksheet since they are fully unsubsidized costs not involving USAC funding in any way. These costs are offset by revenues generated as directed by CHCC to CenturyLink, from time to time, during a “true-up” calculation. Figure 1 illustrates these cost categories, rate bases and prices.

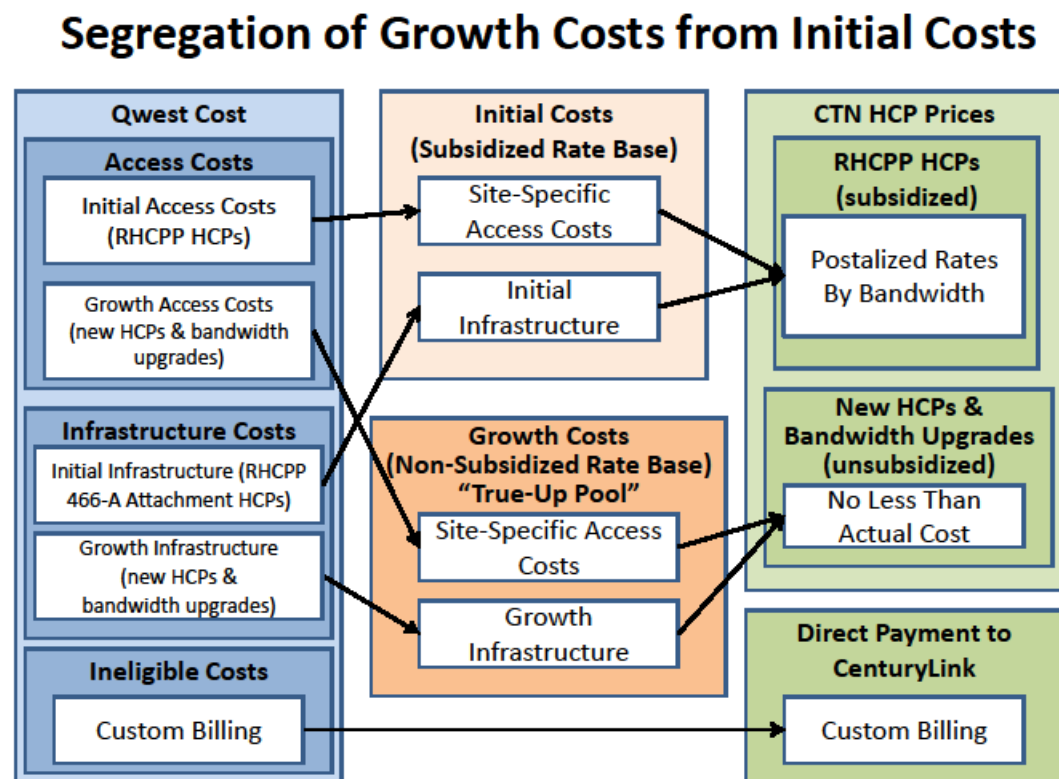

Figure 1: Network cost, rate base and pricing.

A number of cost and pricing issues were raised and resolved in the 14-day letter process. Below we summarize these issues and their resolution:

1. Custom billing. CenturyLink included a cost for custom billing in their overall costs. This was initially shown as a cost element of the Eligible HCP rate base. However, after discussion between RMHN and USAC and FCC personnel, RMHN agreed to classify custom billing as an ineligible expense. The affect of this decision on RMHN's overall cost/price model is apparent

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

- in Figure 1; that is, RMHN has removed custom billing from the rate base and pays for it by direct payment to CenturyLink. This arrangement was incorporated into the RMHN Self-Sustainability Plan.
2. Internet2 expense. The annual subscription for 3 years of Internet2 service had been bundled as a NRC expense in Shared Infrastructure. Since the subscription is for service over time, it was re-categorized as MRC.
 3. Fair share. This issue was raised as to whether non-eligible members were paying fair share. Following discussing with USAC, RMHN recognized changes in pricing policy were necessary to comply with fair share as defined by the FCC. According to October 24, 2008 FCC correspondence from Dana Schaffer, Chief Wire Competition bureau to Scott Barash, Acting Chief Executive Officer, USAC, fair share is determined from the following criterion (last 3 lines, paragraph 2, page 3): "*Participants should demonstrate that the net eligible costs being paid for by Pilot Project funds, for eligible users of the network, is not higher than such costs could have been had a non-eligible component for the project not been included.*" This criterion is met when non-eligible members are not included in the rate base used to calculate eligible member postalized prices. This is why access and infrastructure costs for new members and upgrades for existing members are accumulated in the separate rate base for non-subsidized connections. This process is illustrated by Figure 1.

b. Describe the source of funds from:

i. Eligible Pilot Program network participants

Eligible pilot program network participants use as source of funds their normal operating budget allocations for networking expenses. There is no RMHN-arranged funding provided to HCPs to cover the expense of participant match.

ii. Ineligible Pilot Program network participants

Ineligible Pilot Program network participants likewise pay their fair share of cost through their normal operating budget allocations for networking expenses.

c. Show contributions from all other sources (e.g., local, state, and federal sources, and other grants).

i. Identify source of financial support and anticipated revenues that is paying for costs not covered by the fund and by Pilot Program participants.

All network expenses are paid for by member match and USAC subsidy except for the cost of Custom Billing which is paid for directly by RMHN. The source of funding for this expense is budgeted in the revenue section of the RMHN Self-Sustainability Plan budget. The expense itself is shown as in the expense section of the RMHN Self-Sustainability Plan budget.

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

ii. Identify the respective amounts and remaining time for such assistance.

This is explicit in the RMHN Self-Sustainability Plan.

d. Explain how the selected participant's minimum 15 percent contribution is helping to achieve both the selected participant's identified goals and objectives and the overarching goals of the Pilot Program.

RMHN is the selected participant. We are providing 30.64% of the Total Eligible Costs. Simply put, RMHN and its members, without outside assistance, could not meet the overarching goals of the Pilot Program to deploy a statewide, dedicated health care network in Colorado including those areas of the state where the need for those benefits is most acute. However, with the assistance of USAC, and matching payments from our members, we have been able to contract for and begin the deployment of this network and contribute to meeting the overarching goals of the RCHPP.

7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network.

Non-eligible entities will pay their full share of network costs including non recurring costs (NRC) and monthly recurring costs (MRC).

If non-eligible entities are allowed to join the network, they will be invoiced separately for each service item for their fair share of the network costs without USAC subsidy. These invoices will be provided directly to the for-profit participant. USAC will receive invoice documentation that reflects eligible rural health care providers only.

8. Provide an update on the project management plan, detailing:

a. The project's current leadership and management structure and any changes to the management structure since the last data report; and

The RMHN consortium project is managed by George DelGrosso, the Project Coordinator. The Associate Project Coordinator is Debby Farreau.

b. In the first quarterly report, the selected applicant should provide a detailed project plan and schedule. The schedule must provide a list of key project deliverables or tasks, and their anticipated completion dates. Among the deliverables, participants must indicate the dates when each health care provider site is expected to be connected to the network and operational. Subsequent quarterly reports should identify which project deliverables, scheduled for the previous quarter, were met, and which were not met. In the event a project deliverable is not achieved, or the work and deliverables deviate from the work plan, the selected participant must provide an explanation.

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

RMHN will follow the prescribed process in the FCC Orders. Namely, we will obtain Letters of Agency from each of our participants, complete and file Form 465, select a service provider, file Form 466, obtain funding authorization, file Form 467 as services contracts are established, file the quarterly reports required by Order 07-198, maintain all audit records as required and cooperate with all audit requests.

TARGET (UPDATED) SCHEDULE

June – July 2008	Obtain Letters of Agency (LOA) and Questionnaires
June – November 2008	Prepare Form 465, 465 Attachment and RFP
November 2008 – January 2009	USAC/FCC review and waiting period for bidder responses (Posted 465/RFP December 18, 2008)
January – June 2009	Select and negotiate with vendor, prepare 466-A (Form 466-A and contract posted June 30, 2009)
June – December 2009	Member final sign-up and completion of 466-A package documents. Posted Form 466-A Package and Sustainability Report December 16, 2009.
December 2009 – March 2010	USAC/FCC 466 package and Sustainability Plan review and Funding Commitment Letter (FCL)
March 2010	FCL issued
April-July 2010	Network testing (beta and pilot)
August 2010	Production Network Deployed
September 2010	467 completed, Support Acknowledgement Letter received
September 2010	CenturyLink deployment of 1 member
October 2010-March 2012	Ongoing deployment of members
July-August 2012	Deploy site substitutions
Ongoing	Operational support of existing members

Initial Target Schedule missed some of the target dates, the Target Schedule has been updated to reflect new target dates.

Preparation and informal review of the Form 465, 465 attachment and RFP took longer than anticipated. Time required reviewing, qualifying, correcting and re-reviewing the LOAs, questionnaires, Form 465, 465

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

Attachment, and RFP was incorrectly estimated in the original target schedule. RMHN posted Form 465, 465 Attachment and the RFP December 18, 2008. Allowable contract date: January 15, 2009.

Form 466-A and contract were posted June 30, 2009.

Form 466-A Package and Sustainability Plan posted December 16, 2009.

Funding Commitment Letter (FCL) issued March 11, 2010.

Form 467 posted September 10, 2010 and notification of network initiation posted to FCC ECFS September 14, 2010.

Received USAC Support Acknowledgement Letter September 13, 2010.

The updated target schedule is an estimate only, based on current knowledge of time required to complete tasks.

We will fully complete network build-out within the 5-year period required by Order 07-198.

9. Provide detail on whether network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.

a. Status of obtaining minimum fifteen percent match for the project:

RMHN has 105 health care providers (HPCs) listed on the approved 466-A Attachment and Network Cost Worksheet, 104 as eligible for USAC support, and 1 as non-eligible. RMHN has set pricing such that each eligible participant pays a minimum 15% of its priced rate for the service. In the aggregate, the eligible HCPs pay 30% of total costs. HCPs have committed to a 36-month term of service.

b. Projected sustainability period:

RMHN projects a 10 year sustainability period.

c. Principal factors that were considered by the participant to demonstrate sustainability:

- a.*** We have decided to keep the rates for our eligible members steady once the RCHPP support is expended. Thus, as cited above, eligible members will continue to pay approximately 30% of monthly recurring costs. The remaining 70% will be the responsibility of RMHN and will be raised as described below.
- b.*** We have determined how much revenue will be needed to pay the monthly recurring operating expense of the network once the USAC subsidy is expended. RMHN will take responsibility for

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

continuing the eligible member subsidy at that time. Pro forma cost projects are included in the Self-Sustainability Plan budget.

- c. The Self-Sustainability Plan is based on a business services model rather than a subscription fee model to cover network costs. That is, revenue from the delivery of business services over the network will be used to cover the cost of operating the network.
- d. Sources of revenue included in the Self-Sustainability Plan include: VPN access to the RMHN network for private practice physicians (12,505 licensed in Colorado); dedicated access to health insurance providers; and marketing agreements with health care information technology product vendors.

d. Terms of membership in the network:

RMHN membership is open to all health care service providers, including: physicians; clinics; hospitals; and any mental health service providers; applications service providers that support our institutions with electronic medical records, server space, medical record exchange, billing and similar services; health insurance companies; educational institutions providing CME; etc. This is made explicit in our contract with our service provider.

- Agreements. Each Participating Health Care Provider (PHCP) signs a Participating HCP Agreement with CenturyLink which binds them to the terms and conditions of RMHN's Master Contract with CenturyLink and specifies the terms and conditions of membership as a PHCP. The form of the PHCP Agreement is cited by the Master Contract and included therein as an exhibit.
- Financial and/or time commitments. The Master Contract contains the pricing information for all PHCPs as an exhibit, plus the procedures for making final modifications to this pricing before service begins. By signing the PCHP Agreement, the PHCP agrees to the final pricing, detailed as total, match, and USAC support for both non-recurring and monthly recurring charges. No time commitments or in-kind contributions are asked of the PHCPs.
- Financing of excess bandwidth for growth. Since our Master Contract with CenturyLink is for leased, managed services, we are free to add additional user bandwidth on demand without the need to finance this in advance. The network consumes exactly the amount of bandwidth subscribed.
- Membership fees for non-eligible health care providers/Fair Share. Non-eligible HPPs pay 100% of the network service rates including non-recurring costs, recurring costs and construction costs. The procedure for determining the fair share rates was discussed above and illustrated in Figure 1.

e. Excess capacity:

RMHN has no excess capacity at the network level. All capacity is managed, leased services. The capacity of these services is driven by HCP subscription with CenturyLink, our telecommunications service provider, under the terms of our Master Contract with CenturyLink. The Acceptable Use Policy for the network requires that all capacity leased under the master contract be used to support the primary and ancillary mission of the HCP (consistent with the guidance of the RCHPP order, Para. 76). Non-health care delivery use of the RMHN network is not permitted. Un-related business revenue from use of the RMHN network

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

is not permitted. Incidental use of the network is permitted if it is integral with the HCP's health care delivery system, its providers and its users, and would be difficult for the HPC to quantify or segregate.

f. Ownership structure:

RMHN owns no assets and operates as a facilitator and aggregator of telecommunications services for its HCP members. RMHN enjoys the full organizational support of its founding organization, the Colorado Behavioral Health Council (CBHC). The project coordinator is George DelGrosso, Executive Director, Colorado Behavioral Healthcare Council.

g. Sources of future support:

- Internal. When the USAC RHCPP award is fully expended, RMHN will replace existing USAC support with revenue from its Self-Sustainability Plan.
- Private. RMHN has received a \$399,500 12-month grant from the Colorado Health Foundation to defray administrative expenses through June 2010 with budget revision and no-cost extension provided through June 30, 2011.
- Colorado Behavioral Healthcare Council (CBHC) members have committed to assist in funding administrative costs for 2012 and 2013.
- Assumption of Continued RHC Funding. RMHN strongly advocates that the RHC subsidy mechanism be continued in the future; either in its original form, or, preferably, in a revised form resulting from the successful experiments of the RHCPP.

h. Management costs:

We estimate management costs to be approximately \$33,000 per month. These costs are currently covered by CBHC members and HCP contributions; and will be sustained through revenue from our Self-Sustainability Plan. These costs include: support of the Project Coordinator, the Associate Project Coordinator and support for contracted technical and legal services.

10. Provide detail on how the supported network has advanced telemedicine benefits:

a. Explain how the supported network has achieved the goals and objectives outlined in selected participant's Pilot Program application;

The principal goals of our project are to improve quality, access and affordability of behavioral healthcare in rural Colorado. We are now in process of deploying our network. The network offers medical-grade enterprise networking services otherwise unavailable to individual Participating HPCs. Further, the pricing offered Participating HCPs is substantially discounted from actual cost through USAC support. Seamless medical-grade electronic connectivity for Colorado's entire health care community, anchored by our Participating HCPs, is a first step toward reaching all three of our goals: quality will be improved through the eventual use of health IT to monitor clinical outcomes as associated HIT programs get underway; access is improved through remote diagnosis, tele-consultation, and interactive video continuing medical education;

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

affordability is improved through increased continuity of care made possible by health information exchange carried over our network.

b. Explain how the supported network has brought the benefits of innovative telehealth and, in particular, telemedicine services to those areas of the country where the need for those benefits is most acute;

Colorado has a significant rural presence—47 of our 64 counties are designated rural. Fifty-one of Colorado's counties are in health shortage areas.¹ Forty to sixty percent of Colorado is medically disenfranchised due to lack of access to primary care.² RMHN's goal is to serve the entire state, including these disenfranchised areas. Where telecommunications service was limited to prohibitively expensive, single T-1 circuits, our new minimum standard is 3 bonded T-1s to comprise 4.5 Mbps Ethernet service, or alternatively 5 Mbps where Optical Ethernet is available. In some cases, the optical Ethernet footprint of service providers has been expanded to provision our network, including deployment of \$17 million in optical fiber cable.

c. Explain how the supported network has allowed patients access to critically needed medical specialists in a variety of practices without leaving their homes or communities;

United Health Group's pilot Connected Care initiative, brought advanced telehealth technology to rural parts of Colorado through the network. Connected Care connected patients in rural areas with primary and specialty physicians in suburban and urban locations hundreds of miles away via high-definition virtual visits. In future quarterly reports, we will report on the progress of similar initiatives made possible by the RMHN telehealth network. The following are few examples of how RMHN has allowed patients access to critically needed medical specialists:

1. RMHN provides telemedicine services over the private, secure, Ethernet network for behavioral issues. This facilitates the use of limited psychiatric resources across the state.
2. Recruitment and retentions of psychiatrists has been significantly enhanced with the deployment of the network. This increases the available resource pool allowing for rural residents of Colorado to receive services from remote providers.
3. Increased bandwidth of the network allowed for a rural Western slope behavioral health center to provide 448 televideo services to patients over the last 9 months reducing the need for patient and staff travel outside of their community.

d. Explain how the supported network has allowed health care providers access to government research institutions, and/or academic, public, and private health care institutions that are repositories of medical expertise and information;

RMHN's deployment plan includes connecting our network to Internet2 via the Front Range GigaPoP. The Front Range GigaPoP is a national networking point of presence for government and high speed research networks including Internet2 and National Light Rail. It is operated by the University Center for Atmospheric Research and is a national supercomputer center. All of Colorado's research universities are served by the FRGP, which also has regional connections to Wyoming and Utah.

¹ Source: Colorado Department of Public Health and Environment.

² Access Denied: A Look at America's Medically Disenfranchised. National Association of Community Health Centers, 2007.

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

e. Explain how the supported network has allowed health care professional to monitor critically ill patients at multiple locations around the clock, provide access to advanced applications in continuing education and research, and/or enhanced the health care community's ability to provide a rapid and coordinated response in the event of a national crisis.

RMHN is researching the possible deployment of video services as a value-added feature of our network. This will support rapid and coordinated response in the event of a national crisis by Colorado's entire health care community.

RMHN is evaluating the best method for offering a Physician Access Plan extension of our medical-quality enterprise network to physician and behavioral health service offices. A feature of the plan is to extend RMHN's medical-grade network features (in particular, speed, encryption and QoS) beyond our Participating HCPs to include the 1000s of behavioral health care facilities in Colorado. This will enable seamless integration between the provider offices and facilities providing patient care.

11. Provide detail on how the supported network has complied with HHS health IT initiatives:

a. Explain how the supported network has used health IT systems and products that meet interoperability standards recognized by the HHS Secretary;

RMHN is addressing this requirement through collaboration with the designated Health IT Coordination entity in Colorado, the Colorado Regional Health Information Organization (CORHIO). CORHIO has agreed to use RMHN as the transport provider for hospital data exchange needed to meet interoperability standards.

b. Explain how the supported network has used health IT products certified by the Certification Commission for Healthcare Information Technology;

RMHN provides medical-grade telecommunications transport. Thus, we are the health IT "highway" in Colorado. IT products certified by the Certification Commission for Healthcare Information Technology are the "cars" that will ride on our highway. The responsibility for coordinating HIT in Colorado has been delegated by the Governor to CORHIO. RMHN is and will continue to work cooperatively with CORHIO and the Governor's Office of Information Technology to assure that RMHN's network has the capability and capacity to support the electronic transport of all health IT products adopted by CORHIO.

c. Explain how the supported network has supported the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;

RMHN management tracks the activities of the Office of the National Coordinator for Health Information Technology with particular interest to initiatives, events, and standards that impact the *transport* of HIT. Specific interaction with NHIN trial implementations will be reported in future quarterly reports.

d. Explain how the supported network has used resources available at HHS's Agency for Healthcare Research and Quality (AHRQ) National Resource Center for Health Information Technology;

RMHN management tracks the activities of the AHRQ regarding initiatives, events, and standards that impact the transport of HIT, i.e., telecommunications. Specific interactions with AHRQ will be reported in

Rocky Mountain HealthNet (RMHC)
Pilot Program Participants Annual Data Report
Due September 30, 2013 Including Responsive Data Through June 30, 2013
WC Docket No. 02-60

future quarterly reports. It is noted that CORHIO has completed a Point of Care Inquiry system, a 5-year, \$5 million project funded by the Agency for Healthcare Research and Quality (AHRQ).

e. Explain how the selected participant has educated themselves concerning the Pandemic and All Hazards Preparedness Act and coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and
RMHN has formed an Oversight Advisory Board to coordinate our program with the Act and HHS. We will report progress in this area on future quarterly reports.

f. Explain how the supported network has used resources available through HHS's Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations.

The RMHN Oversight Advisory Board (OAB) also is responsible for advising on interoperability with public health and emergency organizations. To date, coordination with the CDC and PHIN is through our member institution, Denver Health. Denver Health is Colorado's primary "safety net" institution for health care in Colorado. Denver Health includes the Rocky Mountain Regional Trauma Center and the Rocky Mountain Center for Medical Response to Terrorism. We are planning to work with the Colorado Hospital Association's Emergency Preparedness Program to develop a strategic plan for utilization of the network which we will report on in future quarterly report.

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.

This is a pending objective of RMHN. It is on the action agenda of the RMHN OAB. Action item detail includes establishing formal liaison with HHS and CDC, including secure access to our network.
